

H7CX Counter

Multi-Function H7CX Digital preset counter incorporates twelve of the most popular display/output combinations for single and dual output counting into one series.

Available in two supply voltage models for universal usage and inventory reduction: 100 to 240 VAC and 12 to 24 VDC/24 VAC.

Up to 12 types of output modes to best suit any application.

High speed response of up to 5 kHz; can be scaled to 10 kHz; providing flexibility to meet increasing production rates without changing counters.

4- or 6- digit models available to match counting needs. Single output (standard) or dual outputs (advanced).

NEMA 4 front face withstands water wash-down for food/beverage and pharmaceutical packing applications.

Programmable display. PV and SV can be programmed to desired color to alert output status change.

Secure. Multi-level key protection to prevent tampering with settings.
